

CHRISTMAS TREES

General Liability Loss Control

To prevent and minimize claims, the following should be performed:

- Is the mobile equipment, used to move customers or trees, **inspected** daily or hourly to verify safe secure transportation and not overloaded?
- **Are all walking paths and trails clear of debris, mud, snow, and ice?**
- Are “No Trespassing” and “No Smoking” signs and fencing placed on the perimeter of property and enforced?
- Are premises **inspected**, at a minimum daily, to verify that any areas that require repair or cleanup promptly identified and corrected?
- Is the customer parking area properly signed and visible to all vehicles entering the property?
- Are all customers properly supervised on the premises -- prevented from entering storage areas, garages, barns, or any other place where they may be unsupervised and consequently injured?
- Are customers quickly removed from areas that are not for public access? Are trespassers prevented or discouraged?
- Is there adequate lighting so customers can see where they are walking?
- Are animals in controlled areas where customers cannot be injured?
- **Are all employees informed of company policy in regard to correcting and identifying potential trip and fall areas?**
- Are all employees trained or designated to supervise activities to ensure that visitors and operations are never in the same areas of each other?
- Are materials available; rock, straw, etc., to quickly repair any holes, low areas, puddles, and ruts to eliminate potential trip and fall areas?
